Curiosity

Discover the Montessori Difference!

- A Preschool through 6th Grade holistic education which fosters the intellectual, physical and emotional well-being of the child.
- A curriculum that values all of the academic areas, arts and sciences.
- A place where grace, courtesy and peace education are part of every school day.
- An environment that encourages curiosity and creativity.
- Classrooms that have opportunities for students to mentor each other.
- A method based on the stages of child development, where students "learn by doing".
- A small setting where children can become the best versions of themselves.
